

Python Django Questions

Django project setup

1. [Virtual Environment](#)
2. Django install karo
3. Django project create karo
4. Server run karo
5. App create karo
6. App ko settings.py mein add karo
7. First View banao
8. URL seeting
9. Database migrations
10. Admin user banao

Django Basic Questions

1. [What is Django?](#)
2. ★ [How to install Django?](#)
3. ★ [How to check django latest version?](#)
4. [How to check installed packages?](#)
5. [Django:- Latest version](#)
6. [Why is Django Used/Key Features?](#)
7. [Django Architecture \(MVT\)](#)
8. [What is MTV architecture?](#)
9. ★ [Create a Django Project?](#)
10. [Django Project Structure](#)
 1. [what is manage.py?](#)
11. [What is Django Apps?](#)
 1. ★ [How to Create app?](#)
12. ★ [Project vs App](#)
13. ★ [How to run server?](#)
14. [What are the advantages of Django? - no](#)
15. [Difference between MVT and MVC? - no](#)
16. [Why is Django called a "batteries-included" framework? - no](#)
17. [What are Django settings? - no](#)

Django SuperUser Questions

1. [How to create superuser?](#)

Django Models & Migrations Questions

1. What is a Model?
2. ★ What are Migrations?
3. ★ What are Migrate?
4. Difference between makemigrations and migrate?
5. See the all execut command?
6. See the specific App command?
7. What is the Meta Class?
8. What is ORM?
9. Advantages of Django ORM?
10. How do you write raw SQL?
11. What is indexes in Django?
12. ★ What is inspectdb in Django?

Difference between CharField and TextField? What is ForeignKey? What is OneToOneField? What is ManyToManyField? What is on_delete? What is Meta class? What is **str()** method? How do you add indexes in Django? What is a custom model manager?

Django Views Questions

1. What is a View?
2. Types of Views?
 1. Function-Based View (FBV)
 2. Class-Based View (CBV)
3. Function Based View (FBV) vs Class Based View (CBV)?
4. Advantages of CBV?
5. What is Generic View?
6. What is APIView?
7. What is TemplateView?
8. What is ListView?
9. What is DetailView?
10. What is CreateView?
11. What is UpdateView?
12. What is DeleteView?
13. What is Mixin?
14. How to view **all items** in a Model using Django QuerySet?

15. How to **Filter Items** in Django QuerySet?
16. How to **get a particular item** in Django?
17. ★ Difference between **get()** and **filter()** in Django?
18. URLs & Routing What is URL routing? Difference between `path()` and `re_path()`? What is URL namespace? What is `include()`? How do you pass parameters in URLs? What is URL reversing? What is `reverse()`?

Example:

`path('user/`[`int:id/`](#)`', views.user)` 5. Templates What is Django Template Engine? Difference between `{{ }}` and `{% %}`? What are template tags? What are filters? How do you extend templates? What is template inheritance? What is `base.html`?

Example:

`{{ user.username }}` `{% if user %}` 6. Forms What are Django Forms? Difference between `Form` and `ModelForm`? What is form validation? What are clean methods? What is CSRF protection? Why use `{% csrf_token %}`?

Example:

`{% csrf_token %}`

7. Authentication & Authorization Authentication vs Authorization? What is Django Authentication System? How do you create a user? What is `authenticate()`? What is `login()`? What is `logout()`? What is `User` model? What are Permissions? What are Groups? How do you create a Custom User Model? What is `AbstractUser`? What is `AbstractBaseUser`? What is `login_required`? Frequently Asked

Authentication = User ki identity verify karna.

Authorization = User kya access kar sakta hai.

8. Middleware What is Middleware? Django request-response cycle? Built-in middleware examples? How do you create custom middleware? What is `SessionMiddleware`? What is `AuthenticationMiddleware`? What is `CSRF Middleware`? Interview Answer

Middleware request aur response ke beech execute hone wala layer hota hai jo processing karta hai.

9. Sessions & Cookies What are Sessions? What are Cookies? Session vs Cookie? How does Django store sessions? What is `request.session`?
10. Django REST Framework (DRF) What is DRF? Why use DRF? What is `Serializer`? `ModelSerializer` vs `Serializer`? What is `APIView`? What is `ViewSet`? What is `Router`? What is `Pagination`? What is `Filtering`? What is `Throttling`? What is `Authentication`? `JWT Authentication`? `Token Authentication`? `Session Authentication`? What is `Permission Class`? Difference between `PUT` and `PATCH`? What is `Swagger`? Most Asked

`Serializer` Python Object $\rightleftharpoons$ JSON Conversion

11. Caching What is Caching? Why use caching? What cache backends are supported? What is `Redis Cache`? What is `Memcached`? How do you cache views?

12. Signals What are Django Signals? Why use signals? What is post_save? What is pre_save? What is post_delete? Signal vs overriding save()?

Example:

```
@receiver(post_save, sender=User) def create_profile(sender, instance, created, **kwargs): pass
```

13. Django Security What is CSRF? What is XSS? What is SQL Injection? How does Django prevent SQL Injection? What is Clickjacking? What is Security Middleware? Important

Django ORM automatically protects against most SQL Injection attacks.

14. Deployment How do you deploy Django? What is WSGI? What is ASGI? Gunicorn vs Uvicorn? Nginx role? How do you serve static files? Difference between Development and Production?

15. Advanced Django What is QuerySet? What is Lazy Loading? What is select_related()? What is prefetch_related()? Difference between select_related and prefetch_related? What is Custom Manager? What is Context Processor? What is Celery? What is Redis? What is Django Channels? What is WebSocket? What is ASGI? Very Important Interview Question

select_related()

Used for ForeignKey and OneToOne. Performs SQL JOIN.

prefetch_related()

Used for ManyToMany and Reverse FK. Performs separate query and joins in Python. Top 20 Django Interview Questions (Must Prepare) What is Django? Explain MVT Architecture. What is ORM? What are migrations? Difference between FBV and CBV? What is Middleware? Authentication vs Authorization? What is CSRF? What is Serializer in DRF? APIView vs ViewSet? What is JWT? Difference between PUT and PATCH? What is Throttling? What is Pagination? What is Signals? What is QuerySet? select_related vs prefetch_related? What is WSGI and ASGI? How does Django prevent SQL Injection? Explain Django request lifecycle.

Ye 20 questions almost har Django interview (2–8 years experience) me pooche ja sakte hain.
