

Python

1. What is **Python**?
2. **Features** of Python?
3. Python **Frameworks**?
4. What is **PEP 8**?
5. How to get Id of any object?
6. a=1, b=1 does both have same Id or not?
7. Is indentation required in python?
8. File Extensions in Python? -- **.py, .pyc, .pyd, .pyo, .pyw, .pyz**
9. What is the difference between .py and .pyc files?

List

1. What is **List**?
2. **Length** of the list?
3. Check item exist in the list.
4. List Comprehension?
5. Access item of the list/List Slicing?
6. Add item in the list?
 1. Append method
 2. Insert method
 3. Extend method
7. Change item in the list.
8. Change a range of item value.
9. Remove list item
10. Remove method – Remove the specific item(first instance of a matching object)
 1. Pop method without index -- Remove the last item
 2. Pop method with index -- Remove the specified index
 3. del with keyword -- Remove the specified index
 4. del without keyword – delete the list completely
 5. clear method -- Empties the list
11. Copy List
 1. Copy method
 2. List method
12. Join List
 1. Using plus(+)
 2. Using append
 3. Using extend
13. Loop list
14. Sort Lists
15. List method
 1. Append
 2. Insert
 3. Extend
 4. Copy
 5. Count
 6. Index
 7. Pop
 8. Remove
 9. Clear
 10. Reverse
 11. Sort
16. flatten list
17. Difference between List and Tuples in Python?

Tuples

1. What is tuples?
2. Tuple Length
3. How to create Tuple with One Item?
4. How check if Item Exists in tuple?
5. Tuple() Constructor?
6. Packing and unpacking Tuples?
7. Access Tuple Items
8. Add Tuples Items
 1. Append method
 2. Insert method
 3. Extend method
9. Change or Update Tuples
10. Remove Tuples Items(Same as list)
 1. Remove method
 2. Pop Method
 3. Del Method
 4. Clear Method
11. Copy Tuple
 1. Using tuple method
 2. Using copy
 3. Using deep copy
12. Join Tuples
 1. Plus
 2. Multiply
13. Loop Tuples
14. Tuple sort
15. Tuple Methods
 1. count()
 2. index()
16. Difference between List and Tuples in Python?

Set

1. What is **Set**?
2. Get the **Length** of a Set?
3. set() Constructor?
4. Loop Sets?
5. Access Items of set?
6. Add Items of set? -- **Add, Update** method
7. **Remove** Item of set?
8. What is difference between **Discard()** and **Remove()**?
9. Join set?
10. Set Method

Dictionaries

1. What is **Dictionaries**?
2. **Length** of the Dictionary?
3. dict() Constructor?
4. Check if **Key Exists**?
5. **Access Item** of Dictionary?
6. Add Dictionary Items
7. Change Or Update Dictionary Items
8. Remove Dictionary Items?
 1. pop method()
 2. popitem()
 3. del method
 4. del method without key name
 5. clear
9. Copy Dictionaries
 1. copy method
 2. dict method
10. Loop Dictionaries
11. Dictionary Methods
12. Nested Dictionaries

Strings

1. What is Python Strings?
2. Assign String to a Variable?
3. Multiline Strings?
4. Check string exist ot not?
5. Slicing Strings?
6. Change/Modify String
 1. upper case
 2. lower case
 3. replace
 4. split
 5. strip
7. String Concatenation?
8. Format Strings
9. Escape Characters
- 10.

Logical Interview Questions

List:-

1. Ques. Find the Length of a List?
2. Ques. Find the single number (unique element) of the list?
